PORTUGAL EMERGING
AS RELIABLE SOURCE FOR TEXTILES

The tradition of Portuguese Textiles goes back centuries, during which our Region gradually affirmed it self as a woven Must in this Industry. Over the three last decades of the 20th Century, this Region witnessed the extraordinary phenomenon of the bloom of the Clothing Manufacturing Industry which in just 20 years came to employ up to 10.000 persons.

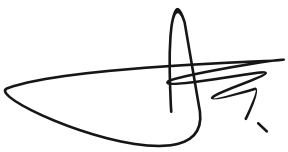
This astonishing growth granted to Clothing Manufacturing the title of the Industry creating more jobs in the Beira Interior Area of Portugal.
The rise of Asian and Eastern European Countries as suppliers supported on a low cost structure affected this reality, with special incidence on the first decade of the present Century.

Recent Economics now show that Macro Economic Curves are bringing Asian and Eastern Countries into modern Era costs, therefore as cost is now comparable, the Portuguese beloved Well Make demonstrates again its natural power of quality, reliability, and quick delivery.

Recent tensions blowing from the Middle-East create inevitable barriers for Sourcing, and again Portugal benefits from its Political and Religious stability taking over a new chance of affirming its Economical viability.

For Twintex the opportunity is real and the new Era is most Welcome!

Confidently Yours,



António Mineiro
Father & Founder

Our goal is to estabilish a system infinitely sustainable.
